

KUBERNETES DEPLOYMENT:

The screenshot displays the Kubernetes dashboard interface. At the top, the header includes the Kubernetes logo, a namespace dropdown set to 'default', a search bar, and user icons. A blue navigation bar highlights the 'Workloads' section. On the left, a sidebar lists various Kubernetes resources: Workloads (with a count of 1), Cron Jobs, Daemon Sets, Deployments, Jobs, Pods, Replica Sets, Replication Controllers, Stateful Sets, Service, Ingresses (with a count of 1), Ingress Classes, Services (with a count of 1), Config and Storage, Config Maps (with a count of 1), and Persistent Volume Claims (with a count of 1).

The main content area is divided into two sections. The top section, titled 'Workload Status', features three large green circular indicators, each representing a different workload type: Deployments, Pods, and Replica Sets. Each indicator is accompanied by the text 'Running: 1' and a line connecting it to the indicator.

The bottom section, titled 'Deployments', contains a table listing the deployment resources. The table has columns for Name, Images, Labels, Pods, and Created. A single deployment, 'app-dep', is listed with a status icon, a link to 'Show all', and a creation time of 'an hour ago'.
